CREATING VALUE THROUGH
AGILE FOR HEALTHCARE

WHY AGILE FOR HEALTHCARE

Software companies have fully embraced Agile software development methodologies in order to lower their cost and better control the requirement management process. Healthcare IT teams are receiving products using this methodology but are not fully leveraging this new methodology for the benefit of their customers and projects.

Our highly trained Agile experts will train your team on how to use this methodology to drive the requirements that you want, ensure the requirements are implemented that you must have, enable innovation, and better leverage the supply chain.

The Agile methodology is based on a collaborative approach for developing software in small increments in order to improve the quality and better leverage the supply change for clinical benefit at your facility. We work with your teams on projects and empower them to not simply follow the suppliers process but Our highly trained Agile experts will train your team on how to use this methodology to drive the requirements that you want, ensure the requirements are implemented that you must have, enable innovation, and better leverage the supply chain.

The Agile methodology is based on a collaborative approach for developing software in small increments in order to improve the quality and better lever-

age the supply change for clinical benefit at your facility. We work with your teams on projects and empower them to not simply follow the suppliers process but to drive the requirements to develop high quality clinical solutions.

BENEFITS OF AGILE

- Lowers the risk of new deployments
- Improves the quality of deployments
- Shortens the time interval to receive working solutions
- Saves project cost with less re-work and shorter cycle times
- Free up your staff to support existing projects that are under staffed
- Bring cash flow back into your organization
- Align Supply chain with projects

LARGENTUM
PROJECT DELIVERY EXCELLENCE

DECREASING COST THROUGH
AGILE FOR HEALTHCARE

BUILDING A BETTER APPROACH

Building a better approach to working with external suppliers who provide technologies using the Agile Methodology can yield tremendous benefits. Using our proprietary methods integrated within Agile allows for enhanced feature benefits, shorter cycle times, and a higher quality solution. If you are not embracing Agile for Healthcare you are sub-optimizing your supply chain and creating additional cost in your infrastructure - let us show you how to leverage Agile for your benefit.
